

BCY[®] 452Xtra BOWSTRING

*Many top compound shooters rate 452X
as one of the best bowstrings in the
world. And it is.*

Too good to be improved...? NO.

452X will become 452Xtra.

In the blend of Dyneema and Vectran,
BCY[®] is now using an upgraded Vectran
which has significantly better abrasion
resistance. So, less fraying.

Same reliability, durability. No creep.
There is no visual difference.

The same strength, size and performance
as 452X, 452Xtra is an improvement to
one of the best bowstrings in the world.
You'll see.

**MANUFACTURED
IN THE USA**
Some raw fibers are produced overseas
